

ANAGHA P H

Software Engineer — Full Stack Developer

+91 9744922368 | anaghamenon7377@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2.5+ years building secure, scalable, end-to-end production-grade systems across backend, frontend, cloud and security using Python, FastAPI, Django, Node.js, and React. Proven track record designing REST APIs serving 10K+ users, reducing API latency by up to 42%, and deploying cloud-native applications on AWS and Linux. Experienced in microservices architecture, CI/CD automation, multi-tenant SaaS platforms, and JWT/OAuth2/MFA/SSO security — consistently delivering 35–65% performance improvements, 99.9% uptime, and enterprise-grade compliance.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL, HTML, CSS
Backend	FastAPI, Django, Django REST Framework, Node.js, Express.js, Flask, Robot Framework, Celery, WebSockets
Frontend	React.js, Next.js, Redux, Vite, Zustand, Tailwind CSS, Bootstrap, Ant Design, Semantic UI, jQuery, EJS
Databases	PostgreSQL, MySQL, MongoDB — ORM, Query Optimization, Indexing, Schema Design, Redis
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, Kubernetes, OpenShift v2, GitHub Actions, CI/CD, Nginx, Caddy, Apache
Auth & Security	JWT, OAuth2, SAML, OIDC, Firebase Auth, MFA, SSO, RBAC, OWASP, XSS / CSRF / SQLi prevention
APIs & Arch.	REST API, Microservices, Webhooks, Google Places API, Cloudflare API, Zendesk API, PayU, Razorpay
Data & Tools	Pandas, BeautifulSoup, Selenium, Web Scraping, Automation, Data extraction, PyPDF, NPM, npnm
Build & Infra	Turborepo (Monorepo), Git, GitHub, Postman, Linux Server Admin, Firebase, Vite, Atom, Secure Coding

WORK EXPERIENCE

Full Stack Developer · Deep Trace Cybernetics, Hyderabad

Oct 2024 – Present

- Architected **ALPHISH Phishing Simulation Platform** for 10K+ targets — built 25+ REST APIs (FastAPI + Node.js), implemented **multi-tenant org architecture with JWT/RBAC**, automated DNS via Cloudflare API, reducing campaign setup **50% across 100+ campaigns**.
- Optimized MongoDB/MySQL pipelines** via index tuning and query restructuring achieving 35% faster API responses; deployed on Linux (Nginx, Caddy, Azure AITM) with 99.9% uptime, Winston structured logging, and Zendesk API integration.
- Built SKAILO**: AI-powered LMS with Whisper STT quiz automation (–60% effort, –40% cost), Gemini AI playlist curation (+45% completion), –65% load time, –42% API latency; delivered 2 weeks early, 15% under budget with zero-downtime CI/CD.
- Hardened enterprise security** with OWASP validation, RBAC, MFA, SMTP encryption, and real-time audit dashboards cutting triage to 15 min; built ALSEC suite improving phishing resilience by 60% and platform usability by 30%.

Junior Python Developer · Zolute Technologies, Indore

May 2024 – Oct 2024

- Developed SNMP-based scanning modules** for NETVISS — querying device OIDs, interfaces, MAC tables, and ARP entries; optimized Python threads reducing discovery latency and improving topology mapping across large enterprise subnets.
- Engineered license verification system** with cryptographic key validation and hardware fingerprinting, preventing unauthorized redistribution; built responsive UI with email validation, notification flows, and lead capture integration for controlled enterprise deployments.

Python Full Stack Developer Intern · SMEC Labs, Kochi

Jun 2023 – Jan 2024

- Built Vogue Stash end-to-end in 15 days** (Django + DRF) — product catalog, cart, orders, and RBAC admin dashboard; integrated Razorpay with webhooks boosting checkout conversion by 25% and reducing page load time by 40%.
- Achieved 99.6% security rating** via session hardening, CSRF protection, and input sanitization; optimized Django ORM with select_related/prefetch_related and indexing, improving backend throughput by 30% and site engagement by 20%.

PROJECTS

ALPHISH — Phishing Simulation Platform | FastAPI · Node.js · React/Vite · Redux · MongoDB · MySQL · Ollama AI · Cloudflare API · Nginx · Caddy · Azure · Winston

- Built **25+ REST APIs** across FastAPI and Node.js, powering a phishing simulation platform for **10K+ targets**; implemented **organization-driven multi-tenant-architecture** enabling consultant-managed enterprises and tenant-scoped campaign execution.
- Integrated **Ollama AI for context-aware email generation** and AITM credential interception; implemented **JWT authentication and RBAC authorization** enforcing secure organization-scoped access across platform services.
- Delivered **React + Redux real-time dashboard** supporting consultant and enterprise workspaces, campaign monitoring, RBAC views, and CSV/PDF audit exports; deployed on **Nginx + Caddy infrastructure with 99.9% uptime**.
- Refactored **MongoDB/MySQL schemas**, introducing organization and department ownership context with indexed tenant-scoped queries; implemented **license validation before campaign launch** while improving API performance by 35%.

SKAILO — AI-Powered EdTech LMS | *React · TypeScript · Node.js · Express · MySQL · JWT · Google OAuth · PayU · Gemini AI · Whisper STT*

- **Architected multi-role LMS** (student/instructor/admin) with JWT + Google OAuth2, PayU payments, and fine-grained RBAC; Gemini AI curation raised completion by 45% and engagement by 35%, achieving 99.9% uptime and zero security incidents.
- **Whisper STT quiz automation** cut content cost by 40% and manual effort by 60%; backend and frontend optimizations achieved -65% load time and -42% API latency with responsive analytics dashboard boosting retention by 25%.
- **Delivered 2 weeks early and 15% under budget** via parallel dev workflows, reusable component architecture, and automated CI/CD pipelines with zero-downtime deployments across full production lifecycle.

TRVELLO — Corporate Travel Benefits Platform (B2B SaaS) | *Next.js 16 · React 19 · TypeScript · TailwindCSS 4 · Firebase Auth · React Query · Zustand · Turborepo · Radix UI · React Hook Form · Zod · Framer Motion · TanStack Table · Papa Parse · Google Places API*

- **Architected multi-tenant B2B SaaS** with subdomain isolation across 3 apps (Platform Admin, Org Portal, Employee Workspace) — 318+ TypeScript files, 49 screens, 40+ shared Radix UI components; scaled to 127 tenants and 4,500+ users in a 10-week MVP sprint.
- **Built Firebase Auth routing** with email-domain detection for individual/corporate/SSO flows; implemented SAML/OIDC, Google/Microsoft OAuth, RBAC middleware, and 50+ React Query hooks with optimistic updates, cache validation and Zustand client state.
- **Engineered Papa Parse CSV import pipeline** with multi-stage validation, duplicate detection, and row-level error reporting; built AI-powered preference matching across 8+ dimensions — accommodation, cuisine, transport, interests — for personalized destination recommendations.
- **Configured Turborepo monorepo** (3x faster builds) with 5 shared packages; React Hook Form + Zod validation, TanStack Table filtering/sorting, Framer Motion micro-interactions, and code splitting for sub-second navigation across all three portals.

ALSEC — Cybersecurity Product Suite | *React/Vite · Node.js · Express.js · MySQL · SCSS*

- **Unified phishing simulation and security awareness training** — reduced phishing risk by 60% with automated scheduling, role-targeted modules, real-time threat exposure scoring, and employee vulnerability tracking across enterprise teams.
- **Designed normalized MySQL schema** for campaign data, security logs, and user events; aggregation queries power live dashboards with risk trends, campaign performance metrics, and employee vulnerability heatmaps.
- **Built comprehensive audit trail** with timestamped logs, CSV/PDF export, and role/date filtering — enabling compliance reporting, post-incident forensic analysis, and full admin action traceability.

NETVISS — Network Security Product | *Python · SNMP · Network Scanning · MySQL*

- **Developed SNMP scanning modules** querying device OIDs, interfaces, MAC tables, and ARP entries for topology mapping; optimized Python threads reducing discovery latency and improving scan coverage across enterprise subnets.
- **Engineered license verification** with cryptographic key validation and hardware fingerprinting; refined probing algorithms improving threat detection accuracy and reducing false-positive alerts in monitored environments.
- **Strengthened product stability** through performance tuning, scanning enhancements, and secure activation mechanisms — ensuring reliable enterprise deployments with controlled tiered feature access and audit-compliant license management.

VOGUE STASH — E-Commerce Platform | *Django · Django REST Framework · Bootstrap · Razorpay · PostgreSQL*

- **Delivered full eCommerce platform in 15 days** with product catalog, cart, order management, and RBAC admin dashboard; achieved 99.6% security rating through session hardening, input sanitization, and CSRF protection.
- **Integrated Razorpay with webhook-based confirmation** and real-time cart updates; automated retry logic increased checkout conversion by 25% and reduced payment failure overhead across full purchase lifecycle.
- **Optimized Django ORM** via select_related, prefetch_related, and strategic indexing — reducing page load time by 40%, improving backend throughput by 30%, and boosting overall site engagement by 20%.

EDUCATION

BSc Instrumentation	2020 – 2023
University of Calicut CGPA: 7.2	
XII	2018 – 2020
PHSS Parli, Palakkad, Kerala 86%	

CERTIFICATIONS

Full Stack Python Developer	Jun 2023 – Jan 2024
SMEC Labs, Kochi
